

Mechanical shutter (large diameter and silent type)

MS-LDS

- -Large diameter (Maximum φ100mm) and silent operation
- Long shelf life (50,000 hours in continuous operation)
- Low-vibration, low-heat generation
 and low-electricity consumption

MS-CSM / Image

This is mechanical shutter with large diameter, silent operation and low heat generation. It also has long shelf life (50,000 hours in continuous operation).

Various aperture size is available depending on request.

Composition

Mechanical shutter
Driver

Price and lead time

Price: USD 6,900

(Ex-works Japan and without Tax)

Lead time: Around 1-2 months

after order receipt

Application

Switch for high-power laser and pulse picker Camera shutter for large size CCD•CMOS Camera

Interruption of soft X-ray
Microscope and telescope
Spectroscope

Specification

Item	Specification
Clear aperture	60 mm (Maximum 100 mm)
Shutter method	1 blade
Operation	Stepping motor controlled by closed loop
Switching speed	63 ms (low vibration)*
Maximum continuous frequency ratio	7 Hz*
Expected lifetime	Over 10 ⁸ cycle
Operation signal	TTL

^{*} Faster switching speed and frequent ratio are made with some vibration accepted.
